qualify as a  a) Either i.	A GDN has had to isolate and condemn an essential gas appliance following a supply interruption or as part of its emergency service role; or	t the following criteria:
ii.	A GDN or its Project Partner has identified an essential gas appliance which has not been serviced in the last 12 months in the owner-occupied home of a customer in a Vulnerable Situation where an occupier of the property suffers from a permanent or temporary health condition that makes them more vulnerable to health risks associated with cold homes; or	N/A
iii.	A GDN or its Project Partner has identified an essential gas appliance which has not been serviced in the last 12 months in a tenant-occupied home of a customer in a Vulnerable Situation where it is the tenant's responsibility to maintain the essential gas appliance, where an occupier of the property suffers from a permanent or temporary health condition that makes them more vulnerable to health risks associated with cold homes.	

Company Obligation (ECO4) Guidance: Delivery document1 (see Appendix 1).	
c) Sufficient funding is not available from other sources (including a social or private landlord, national, devolved, local government funding) to fund the essential gas appliance service.	N/A

Section 3 - Eligibility criteria for Collaborative VCMA Projects			
To qualify as a Collaborative VCMA project, a project must:			
a) Meet the above company-specific and boiler repair and replace (if applicable) project eligibility criteria;	N/A		
b) Have the potential to benefit consumers on the participating networks; and	N/A		
c) Involve two, or more, gas distribution companies.	N/A

Total Cost (£k)	Partner costs: £51,792  Management costs (4%): £2,071.68
Total VCMA Funding Required (£k)	£53,863.68
Problem(s)	The cost-of-living and fuel poverty crisis continues to affect everyone, with many people feeling stressed, lonely or financially insecure. Anyone can be impacted by poor mental health, and it is important that we not only look after our customers but also ensure we are prioritising our colleague's wellbeing.  Cadent's engineers visit homes and regularly come into direct contact with individuals who may be vulnerable. Often engineers don't know what to do in such situations or where to guide customers to. This project will allow our engineers to hand details of this project to
	guide customers to. This project will allow our engineers to hand details of this project to customers to give additional support.

Services like Shout can act as a lifeline to people experiencing difficulties with their mental health. Shout's text message support offers customers and colleagues a way to seek help via an anonymous service for support and guidance.

We want to provide our customers and colleagues with as many support options as possible and it's important that we give people in crisis the ability to ask for help in a way that is most comfortable to them.

Some individuals may be comfortable speaking to a support service over the phone or in person however calling a support service personally can be intimidating to someone in crisis and may not be suitable for everyone. Providing the option to anonymously text Shout for support can take away that fear and allow customers and colleagues to accept the help they need.

### Project Shout (MHI) - Research and how they can support

Mental Health Innovations has seen significant continued growth in overall demand for mental health services. In February 2022, NHS Confederation figures suggested 1.6m people in England alone were waiting for specialised mental health treatment and a further 8m people would benefit from support but were unable to get onto waiting lists.

In this context, the availability of immediate, 'in the moment' support from Shout is even more important, and demand for the service continues to grow. Shout supported 630,047 conversations from mid-July 2021 - mid July 2022, an increase of 45% on the previous 12 months and currently support an average of between 1,600-1,800 conversations each day.

#### Two million conversations

In a recent report MHI announced they had reached the milestone of two million text conversations. In this report they highlighted the risk and increase in communication with people living in poverty. This highlights the need for us to offer this service to both our customers and our colleagues. The below extract is taken from the report. The full report can also be found here: <a href="FINAL\_Two\_Million\_Report\_cHLavT6.pdf">FINAL\_Two\_Million\_Report\_cHLavT6.pdf</a> (ams3.cdn.digitaloceanspaces.com)

### Those in poverty

While 3% of conversations are with texters specifically contacting MHI about financial difficulties, they are contacted every day by hundreds of people who are much more likely to be in poverty and impacted by the cost-of-living crisis. Among children who contact the service, 25% of texters under the age of 18 are from a disadvantaged background and in receipt of free school meals. More than a fifth (21%) of adult texters are unemployed. Additionally, they see demand for Shout across the UK correlating with national indices of deprivation. This means that people from more deprived areas in the UK are more likely to contact Shout than those living in the least deprived areas.

### **Scope and Objectives**

Our new partnership with Shout offers 24/7, free and confidential text support from a trained mental health advisor, available to all our colleagues and customers. Shout launched in 2019 with the mission to provide support to people who are anxious, stressed, depressed, suicidal or overwhelmed and in-need of someone to confide in. Our colleagues and customers can now access 2,100 trained volunteers and support over 2,000 individuals each day through text conversations. There will be support and guidance available for anyone that needs it 24 hours a day 365 days a year. This free to use service will be a lifeline for people that are struggling mentally and will ensure that they have someone to talk to. The Shout team will also signpost and refer customers and colleagues to income maximisation advice, debt advice and energy efficiency advice as required.

Following the initial contact being made by the customer or colleague, Shout will endeavour to support them with immediate support. Where the customer or colleague is experiencing mental ill health due to the impact of debt or money worries, they will then make onward referral to Cadent's partners to gain targeted support and advice on income maximisation, debt management and energy efficiency advice. These additional measures will help to deliver enduring solutions to our customers and colleagues.

# Why the Project is Being Funded Through the VCMA

We believe that the project meets all the Vulnerability and Carbon Monoxide Allowance eligibility criteria:

a. Have a positive, or a forecasted positive, Social Return on Investment (SROI) including for the gas consumers funding the VCMA Project:

The project delivers a positive forecasted social return on investment. This is based on achieving the target reach for income maximisation, registrations to the PSR and energy efficiency training. More information can be found in the relevant section below.

#### b. Either:

- i. Provide support to consumers in Vulnerable Situations and relate to energy safeguarding, or,
- ii. Provide awareness of the dangers of CO, or,

The project delivers services that meet all three elements of this criteria. For example, the specialist advisors will help households maximise their income, enabling residents to afford the cost of heating their home to an adequate level. The project will also raise awareness of the of the support that is available for mental health challenges. The project will also signpost and refer the users to services that will benefit them in terms of energy efficiency advice, debt advice and income maximisation support.

c. Have defined outcomes and the associated actions to achieve these:

Cadent and MHI have entered into a service agreement that will contain the project objective and actions. Further detail can also be found below.

d. Go beyond activities that are funded through other price control mechanism(s) or required through licence obligations, and, this method of delivering support to customers in vulnerable situations falls outside of Cadent's BAU activities and other licence conditions

Yes.

# Evidence of Stakeholder/Customer Support

Cadent conducted extensive stakeholder and customer research following the completion of RIIO-GD2 year one and again after year two. The aim of the research was to assess customer/stakeholder opinion on Cadent's allocation of VCMA spend and gain insight on where we should direct VCMA funding in the future. The results of our research studies, including our Energy Diaries thought leadership programme are available to view on the Cadent website. However, we've captured some of the key evidence below.

- 61% of stakeholders (the highest proportion by individual category) supported Cadent increasing its VCMA allocation on projects aimed at tackling fuel poverty.
- Over 70% of customers are concerned about the level of their energy costs
- Very few customers understand their energy bill
- Less than 20% of customers feel as though they understand the range of support opportunities that they may be entitled to
- There is very low trust associated with energy companies

This project focuses on offering a support service for any customers that are experiencing difficulties with any of the above, as well as being able to support with mental health issues that may be made worse by the stress and worry about the cost of living.

As well as customers, colleagues are also experiencing tough times and this service will also be available and valuable to them.

## **Information Required**

#### Description

# Outcomes, Associated Actions and Success Criteria

We will track usage through monthly keyword data that MHI provide. We will be promoting this service through our internal safeguarding champions, which we have in each business unit.

# **Project Outcomes**

The MHI project shout initiative aims to deliver the below outcomes and successes:

	<ul> <li>Demography breakdowns (dependent on texters completing the survey at the end of the conversation</li> </ul>	
	Number of Active Rescues per month and breakdown of stages associated with	
	<ul> <li>this</li> <li>Most common conversation issues</li> </ul>	
	Number of conversations signposted to local services	
	80% of texters who say the conversation was helpful	
	80% of texters who say they feel calmer	
	80% of texters who say they feel like they can better work out problems  Proof down of whom to they bear deposit the contribution (consist modile professed by a contribution).	
	<ul> <li>Breakdown of where texters heard about the service (social media, referred by a friend or family, marketing campaign)</li> </ul>	
	Analysis of general spikes in activity for the Shout service and what this may be	
	attributed to	
	Texter feedback and quotes directly related to your keyword	
	Success Criteria	
	The success of the project will be measured against meeting the below criteria:	
	2,000 individuals (Customers or employees) will use the service to support them  uith their individual poods and spin accessor, current.	
	with their individual needs and gain necessary support 2,000 individuals (Customers or employees) will receive advice and support	
	from using the service and gain necessary support.
