

Standard Connections Charges - Alterations

Effective from 1 August 2018

Cadent's standard charges for alterations are being revised with effect from 01 Aug 2018.

Following a review of our cost base, Cadent has revised its charges to reflect the costs of providing the Alterations in each geographical region we operate. Our revised charges have been calculated in line with our published Charging Methodology. The new charges are shown in the table below and exclude VAT.

Length of Service	East Anglia	East Midlands	London	North West	West Midlands
0-5m	£974	£652	£1,366	£652	£652
5-10m	£1,330	£1,060	£1,920	£1,060	£1,060
10-15m	£1,686	£1,340	£2,470	£1,340	£1,340
15-20m	£2,102	£1,620	£3,270	£1,620	£1,620

During our review of costs we identified that costs varied significantly across our East of England area. Having considered this trend, we have identified there is a difference in the cost of delivering our service, with the East Anglia area costing more than in East Midlands. Therefore, we have reflected this difference in our pricing in East of England by offering a different price in East Anglia and East Midlands to reflect the underlying costs in each geography. The table below highlights the discounts that are available against the standard charges.

Characteristic / option for	Saving against standard charge
Customer elects to dig and reinstate their own trench on private land	33%
Customer supplies and installs their own meterbox	5%
Customer arranges for their own gas safe engineer to relocate their meter	5%
Customer arranges their own internal pipework and reconnection (incl. purge & relight of appliances)	5%
Back to back alterations where a meter is moving from inside to outside or outside to inside	33%
