Your Gas Network

Network Topology

2021

Introduction

In December 2020 OFGEM published their RIIO-2 Final Determinations for the Transmission and Gas Distribution Network (GDN) price controls. These set out the key elements of the price control from 1 April 2021 to 31 March 2026. This included a new licence obligation for the gas transporter licence holders to comply with an enhanced obligations framework in relation to the exit capacity booking process.

Standard Special Condition (“SSC”) A57 (Exit Capacity Planning) of the gas transporter licences requires the licence holder (“licensee”) to comply with the Exit Capacity Planning Guidance (“the Guidance”) which is available here: [Exit Capacity Planning Guidance | Ofgem](#)

This document delivers the requirements of the Transition Arrangements, paragraph 4:

- *GDNs should publish on their websites their Network Topologies for the 2021 booking cycle by 30th April 2021.*

In external versions of this publication some of the information has been redacted for the protection of Critical National Infrastructure (CNI).

If you have any queries or would like any further information please contact our planning team: LTSPanning.AnalysisRequests@cadentgas.com

East of England

Offtake	Topology	Control	Max Flow (mcm/d)	Min Flow (mcm/d)	Downstream MOP (bar)	Changes Over the Past Year	Anticipated Changes Over the Coming Year
	<p>This information has been redacted due to its sensitivity in line with BEIS and the CPNI general principles of security around its wider disclosure</p>						

North London

Offtake	Topology	Control	Max Flow (mcm/d)	Min Flow (mcm/d)	Downstream MOP (bar)	Changes Over the Past Year	Anticipated Changes Over the Coming Year
