

Cadent

Your Gas Network

Transforming experiences

Customers. Communities.
Colleagues.

Our Plan highlights
2021-2026
East of England

We are Cadent

Your gas network

We own, operate and maintain the largest gas distribution network in the UK. This is made up of four separate networks, including East of England, North London, North West and the West Midlands. If you haven't heard of us, it's probably because our name is quite new – we used to be part of National Grid.

Our network of pipes stretches over 80,000 miles to over 11 million homes and businesses. We own the pipes, but we don't own or sell gas; this is the role of your gas supplier.

How we are funded

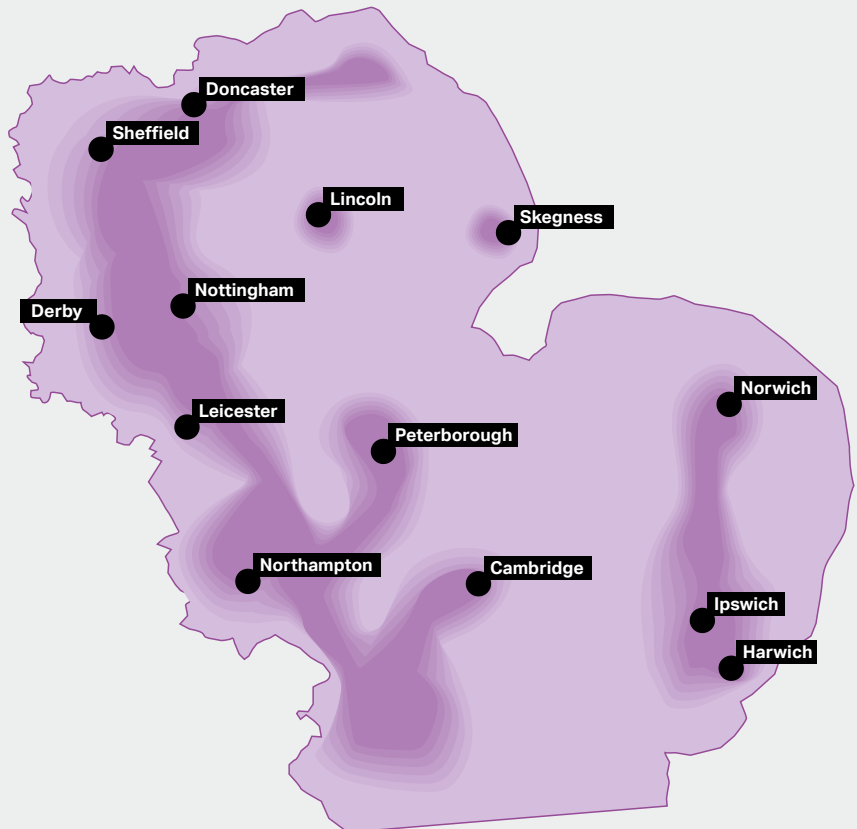

Gas suppliers pay us to transport their gas to your home. You pay for the work we do through your gas bill. Although it comes from your gas supplier, our costs are included and make up about 20% of the overall bill.

We run the National Gas Emergency Service on behalf of the gas industry. We're the people you call if you have a problem with your supply or can smell gas.

The East of England

East of England is our largest network serving 4m customers across East Midlands and East Anglia, with significant levels of customers in rural locations from Humberside down through Lincolnshire, Norfolk and Suffolk.

Our East of England network also serves customers in the relatively high density cities of Sheffield in the north, Derby, Nottingham and Leicester and Cambridge in the south, as well as customers in the north of London, including the Tottenham area.

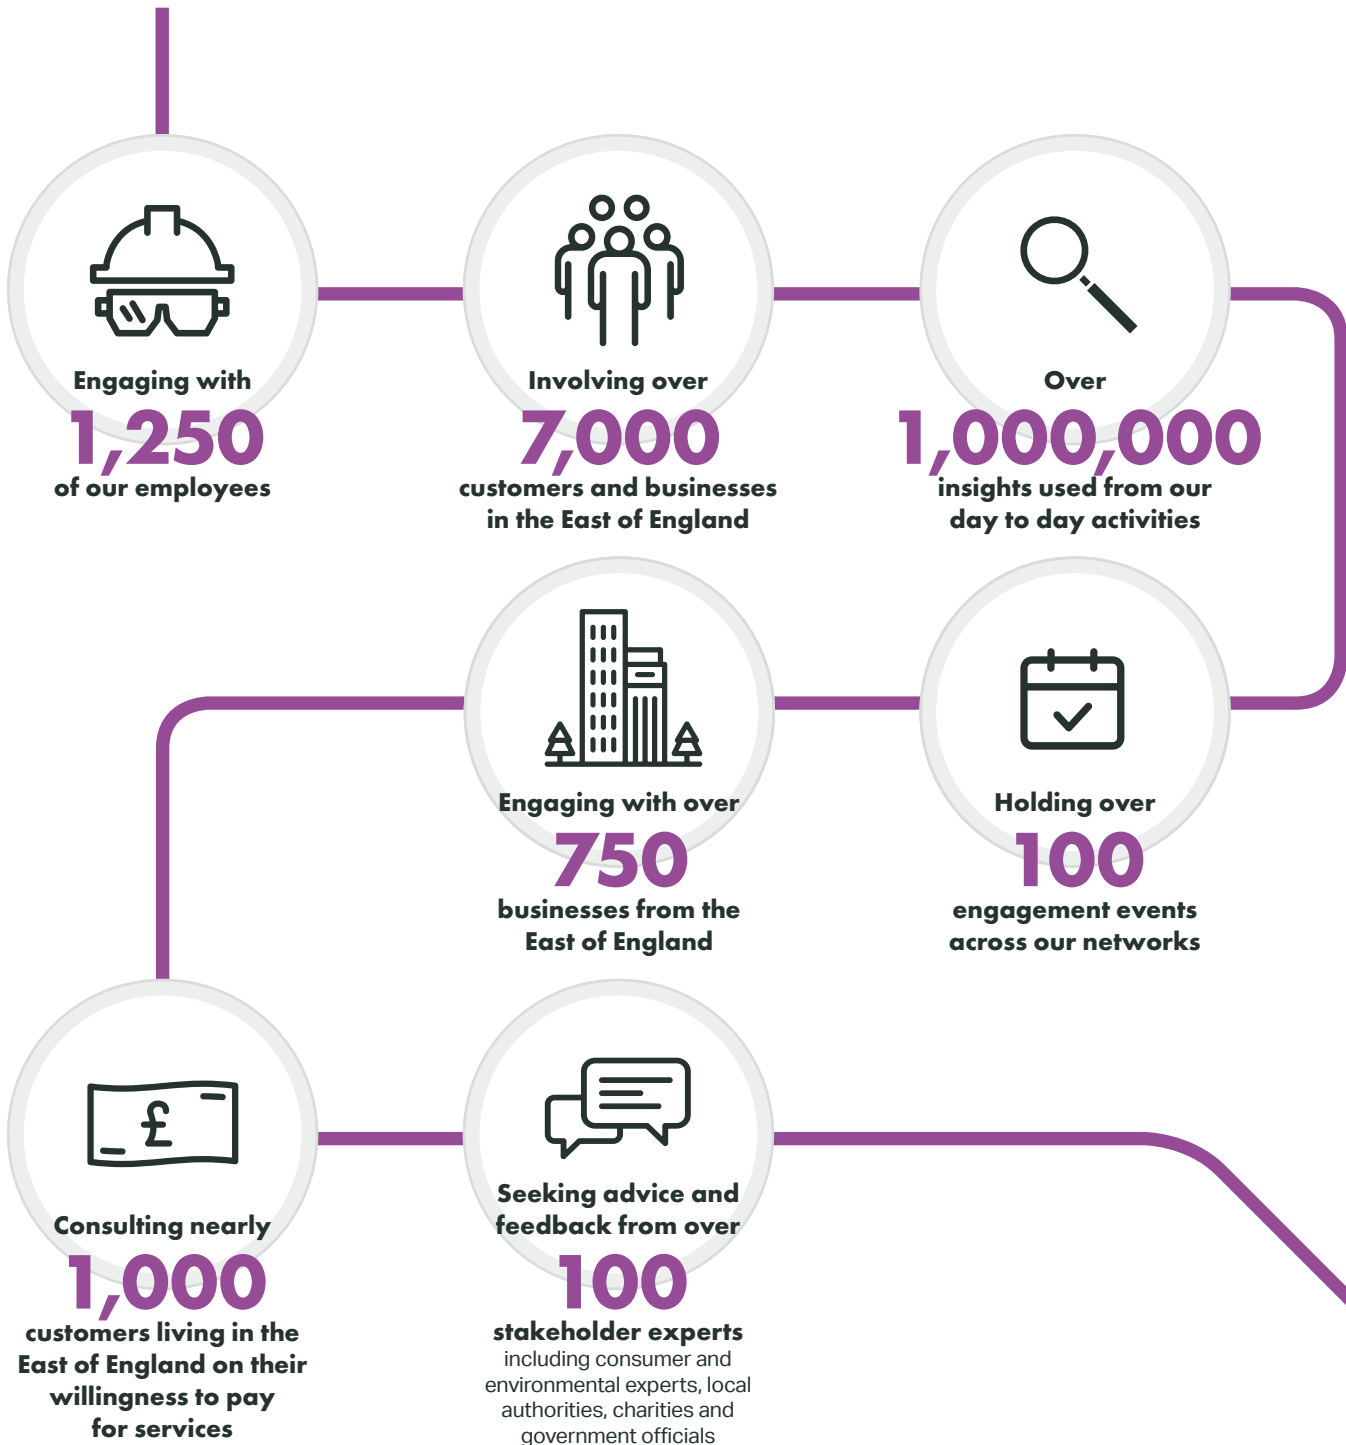

National Gas Emergency Service

0800 111 999

All calls are recorded and may be monitored.

Creating our future plans with you

We've spent the last 18 months understanding what you expect from us now and in the future. We have undertaken an unprecedented level of engagement across each of the communities we serve. We have also established a highly skilled, independent Customer Engagement Group to challenge us and ensure we deliver the best for you.

Our vision

Overview

Our vision is to set standards that all of our customers love and others aspire to.

By bringing together our vision and your priorities, we are making commitments that will make a real difference. These commitments have been formed from what you told us was most important to you.

Using a six phase engagement process, we have listened to your feedback, tested various options and ultimately tested our final Plan to ensure it meets your expectations. Over 80% of you said that it does.

These commitments help you hold us to the very highest standards, and help us measure our performance. The following pages highlight some of our commitments.

Trusted to act for our communities

We understand that customers place trust in us and our work. We will focus on building trust through every action we take, giving over 1% of our post-tax profits back to our communities through the Cadent Foundation.

Tackling climate change

We will take a leading role to support the UK's Net Zero emissions challenge, coordinating with others across the energy industry as we transition to cleaner sources of energy. We will reduce leakage of gas from our pipes and become carbon neutral in our other operations by 2026.

Providing a quality customer experience

We are committed to providing an outstanding customer experience, tailored to individuals' needs. We will provide inclusive and accessible services to all, going beyond to support those most in need.

A resilient network

We will invest £243 million each year to maintain a reliable gas supply that keeps our customers, communities and employees safe in the East of England.

Delivering our commitments in your region

Case study:

Ensuring a reliable supply of gas to the East of England

Due to the East of England being made up of many towns and cities that are widely dispersed across the area, we use large steel pipes as it is the most suitable material to carry large volumes of gas to heat these areas.

Through our mains replacement programme we look to proactively replace these pipes, along with other metal pipes, to ensure a reliable supply of gas to our customers.

We are looking to increase the reliability of our gas network by investing £25 million in steel pipes in the East of England to add an additional level of protection through a process called cathodic protection.

Case study:

Supporting customers in vulnerable situations in the East of England

When we know who is behind the doors to the homes we deliver gas to, we can provide a more personal and tailored service. One way we tailor our service is by providing additional support to those registered on the Priority Services Register.

We will be having direct conversations with 760,000 customers in the East of England. We will also be partnering with all the Fire and Rescue, ambulance and NHS Trust services within the East of England in order to reach and support more customers living in vulnerable situations.

Case study:

Green gas in Cambridgeshire

We have installed temporary monitoring equipment 'green cabinets' across our Cambridgeshire network. The equipment tells us how much green gas is coming through the pipes, and how far it is travelling all through the year.

This innovation project is exploring how energy billing may adapt to new types of gas flowing through the network, such as biomethane and hydrogen.

A resilient network

Keeping the energy flowing safely and reliably

You've told us that **maintaining a safe gas network** for our customers, communities and employees while **ensuring a reliable gas supply** is the most important part of what we do.

We have worked hard to establish **world class safety** performance and a **network reliability over 99.99%**. This means our customers will only receive a gas interruption once every 40 years on average. But we want to do even better. We are investing to improve the health of our pipes and infrastructure and continue to evolve our data, cyber security and physical security provisions.

We will continue to replace iron and steel pipes with more durable and longer lasting plastic pipes to help ensure a safe and reliable gas network. This is almost three times the distance from Cambridge to Sheffield."

579km per year in the East of England

We will continue to **respond to gas emergencies** within an hour of them being reported to us, 97% of the time (average arrival time of 35 minutes)

We have developed robust information systems and a cyber security plan which will dedicate **£21 million to protect physical and data assets**

We are investing over **£13 million to enhance the efficiency** of our assets which supply multi-storey buildings in the East of England. This will reduce the likelihood of supply interruptions and get customers living in these buildings back on gas much quicker where interruption is unavoidable

We will use **innovative technology** to keep the energy flowing and **minimise disruption** and road congestion caused by our works

A quality experience

For all our customers, stakeholders and communities

You'll probably never need to contact us directly, but if you do, **we're committed to providing an outstanding experience.** That's why we're putting new standards in place to measure and significantly improve our service levels across all our customer journeys.

We've listened and worked to understand more about what you need and value. In particular, you've said you'd like us to do more to help people in vulnerable situations and play a leading role in raising awareness of the dangers of carbon monoxide.

We are transforming our organisation to put our customers at the heart of all we do, creating 28 regional delivery units

We will make it much simpler to connect to our gas network, providing domestic connections customers **with accurate quotes in just 15 minutes**

We will **continue to listen to your feedback** about how we are doing, using a variety of channels. We will measure your satisfaction levels to **improve and learn year on year**

We will **reduce disruption** by providing **better road work information**, and **work with other utilities** when planning our activities to reduce the number of holes in the road

We will provide a more convenient service, offering **2 hour appointment slots** for all gas supply restorations

We will issue 1,240,000 carbon monoxide alarms to homes within the East of England."

We will extend support and **help our customers in their homes, by forming partnerships** with charities, other Gas Safe Registered organisations, NHS Trusts and the Fire and Rescue Service to go beyond the boundaries of our network

We will **educate 76,000 people** about the dangers of carbon monoxide

We will **support 10,900 households living in fuel poverty** in the East of England by providing a free gas connection, in-house interventions and income and energy advice

We will have direct conversations with **760,000 customers living in the East of England** to raise awareness of the **Priority Services Register (PSR)** so that we can better identify and serve customers with additional needs

We will educate 76,000 people living in East of England about the dangers of carbon monoxide including continuing the successful Safety Seymour programme, which educates primary school children how to stay safe at home, by identifying and reducing the risk of carbon monoxide poisoning."

Our Customer Vulnerability Strategy aims to create an inclusive and accessible service for all

Tackling climate change

Leading the transition to a sustainable energy system

You told us it's vital we take action now to protect our planet for future generations, by **reducing carbon emissions** and our impact on the environment to support the UK's climate change targets. We are a major part of the UK's energy industry and you want us to **take a leading role** in supporting the right energy solutions.

We want to show how we can help support the removal of carbon from the gas that flows through our pipes, and support alternative fuels for transport. This means working with government and policymakers as well as **investing in innovative sustainable low carbon energy alternatives** like hydrogen.

We will provide flexible capacity for **clean gas resources** such as **biomethane**

We will buy **zero emissions** emergency response vehicles across the East of England

We will reduce leakage of **gas** from our pipes by **13-15%** by 2026

We will become carbon neutral in our day to day operations by 2026, 24 years earlier than the Government target. We plan to do this by reducing energy and carbon consumption, opting for renewable or low carbon alternatives and offsetting all residual unavoidable emissions."

We will **develop joint planning offices** with electricity networks to support regional authorities to develop **whole system solutions** to their energy plans

We will send **less than 5%** of waste from digging up the road **to landfill**

Trusted to act for our communities

Being transparent in all our actions

Being trusted is extremely important to us. We're an essential public service provider so it's important that you **trust us to act responsibly** for our communities and always deliver on our promises.

Based on what we have heard, we have created a **Trust Charter** and we will **publish how we are performing** against our commitments within it. We will continue to transparently publish our profits, tax and pay.

We have set up the Cadent Foundation, a community fund to give over 1% of our annual post-tax profits (c.£6m p.a.) back to our communities, particularly customers in vulnerable situations."

We will make Cadent a great place to work, promoting and celebrating diversity and inclusion. We will support our employees with their **personal development** and ensure over **24,000 training days** per year

We will continue to engage with customers, businesses and stakeholders to ensure we continue to deliver the **standards that you love**

We will **be transparent** in how we operate, reporting on our performance against the commitments that we have made to our customers and communities

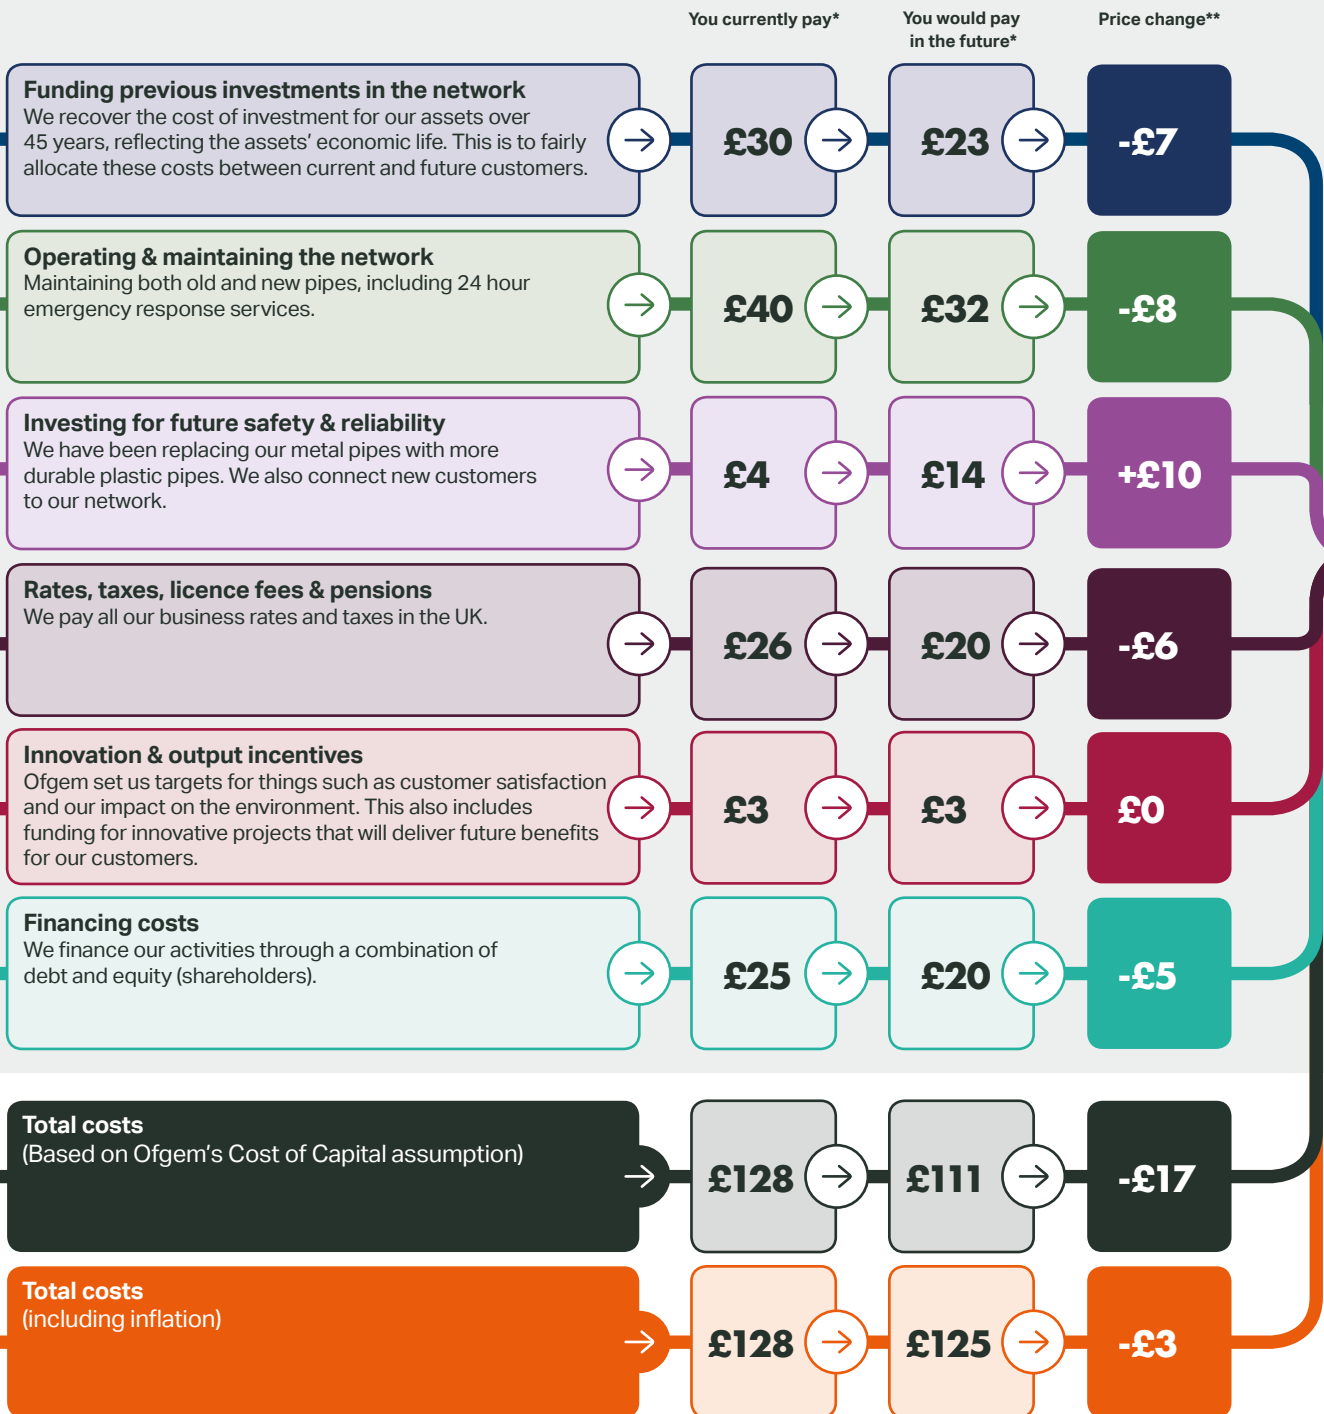

We will give back to our communities by supporting **over 2,500 colleagues in volunteering activities**

Providing you with more value for less

You will receive a gas bill from your gas supplier which is on average £640* per year. Your bill is made up of different charges. Your supplier currently charges you on average £128 per year for the services we provide This is about 20% of your annual gas bill.

Over the next five years we will reduce our impact on your bill by an average of 13% (£17**) by driving efficiency savings through innovation, competition and transforming our organisation.

Our services cost just 30p per day as part of your future gas bill**

*Assuming your average annual gas bill is £640
**Excluding inflation

We are listening and would love to hear your feedback

This document highlights some of the commitments we are making for 2021 to 2026. We would love to hear your thoughts.
