Wanstead Park Road Allotments

As part of our ongoing commitment to maintain the integrity of our pipes and assets, we will be needing to carry out some routine maintenance and upgrade work at our Redbridge site, which is situated on Redbridge Lane West. We'll maintain the site's current level of security during the refurbishment work and beyond.

Our essential programme of work has been developed our programme of work Government's Health and Safety Executive and the energy regulator Ofgem, so that we can continue to provide safe and reliable energy to homes and businesses, to provide vital infrastructure to support economic growth for years to come and to enable NetZero.

The proposed compound area will be located adjacent to Wanstead Park Road allotments. There will be no direct impact on your allotments as the compound will be situated next to the allotments behind a screen of trees. In order to make the current route safe and practicable for the duration of our works, we will be improving the existing route, making it into a more robust road to allow our vehicles to transport equipment safely. We expect this road to be temporary and our vehicles will be governed by a minimal speed restriction.

We would like to hear your views - all feedback submitted will be taken into consideration to inform our strategy.
